

Dr Barry L. Duncan
presents :-
**What makes a
Super-
Therapist?**

Some therapists achieve significantly better outcomes than their peers, even using the same model. Barry Duncan and his associates have spent decades researching therapeutic change—what works in therapy—and importantly, what makes one therapist better than another. Through research and a degree of detective work they have established which factors contribute to superior performance in therapy – and it is not what you might first think.

In this rapid-fire workshop, Barry describes three things you can do immediately to join the ranks of 'Super-Therapists.' Barry will also introduce the Partners for Change Outcome Management System (PCOMS), a designated evidence based practice that improves outcomes via identifying clients who are not responding, allowing alternative intervention paths before dropout or a negative outcome. PCOMS has been successfully implemented in the USA , Canada, the UK, and in 20 countries around the world.

Barry L. Duncan, Psy.D. is a therapist, trainer, and researcher with over 17,000 hours of clinical experience. He is the author of over 100 publications including 17 books, the latest of which is "On Becoming a Better Therapist (APA, 2014). He is CEO of Better Outcomes Now (betteroutcomesnow.com), and the developer of the clinical process of the Partners for Change Outcome Management System, a designated evidence based practice.

The workshop is suitable for all those who are engaged in therapeutic interactions with clients. It will contribute 1.5 hours Continuing Professional Development

22nd Oct 2020 1500 – 1630
(recording available for 30 days)
