

A Skills Based Approach To Treatment Resistant Depression

Getting to the heart of how depression is maintained, these mindfulness-based therapeutic techniques target the key features of behavioural over-control and emotional constriction.

In this workshop Professor Thomas Lynch will:

1. Describe how to help clients who have not responded to medication or standard CBT.
2. Share his underpinning theory, based on 15 years of clinical trials and research.
3. Provide patient-friendly materials which can be used in groups and with individuals.
4. Demonstrate how to coach clients to open up to emotional experiencing and reduce envy or bitterness, thereby raising their capacity for joy.
5. Expand your skill-set for treating other disorders in which over-control and emotional constriction is a feature, such as anorexia, OCD and social anxiety

Thomas R. Lynch is Professor of Clinical Psychology in the School of Psychology at Southampton University and Director of the Emotion and Personality Bio-behavioural Laboratory. He is a world-leading researcher and senior trainer of Dialectical Behaviour Therapy (DBT) and leads the bio-behavioural laboratory at Southampton with a focus on understanding personality/mood disorders and their interface with basic emotion processes. He has received multiple large research grants from a range of sources, including the National Institutes of Health, National Alliance for Research on Schizophrenia and Depression, American Foundation of Suicide Prevention, and the Hartford Foundation. Currently he is the Chief Investigator of a multi-centre randomized controlled trial of a new DBT treatment approach for chronic and treatment resistant depression funded by the Efficacy and Mechanism Evaluation programme and Medical Research Council—Project REFRAMED. He is a recipient of the John M. Rhoades Psychotherapy Research Endowment and a Beck Institute Scholar. His book outlining a new DBT adaptation, entitled Dialectical Behaviour Therapy for Treatment Resistant Depression; Targeting Emotional Over-Control is forthcoming.

Professor Lynch is well-known for being an authoritative, entertaining and charismatic speaker.

This two-day workshop is suitable for mental health professionals including clinical and counselling psychologists, counsellors, social workers, mental health nurses and CBT practitioners.

It will contribute towards BABCP CPD requirements

10th - 11th Sept 2012 09.30 – 16.30

Oriel College, in the centre of Oxford, was founded in 1326 by Edward II as “The College of the Blessed Virgin Mary.” It takes the name Oriel from the projecting window of one of the original fellows houses on the site of the now Front Quad. It is the fifth oldest of Oxford's colleges and its alumni include Walter Raleigh, Gilbert White and Cecil Rhodes. It was the last of the Oxford colleges to admit women (in 1984). Further details can be found at oriel.ox.ac.uk.

Lunch will be served in the magnificent dining hall

The Harris Lecture Theatre is a state of the art, ground floor, lecture theatre with toilet facilities and breakout rooms within the same building.

Delegates wishing to get the Oxford student experience can go to www.oxfordrooms.co.uk and book a room online (these rooms are basic and please note that Oriel College does not participate in this scheme) or for a full range of accommodation in Oxford go to www.visitoxfordandoxfordshire.com
